The Canadian Men's National Football Team has transitioned into a different dimension in footballing terms, climbing the FIFA rankings from as low as 122nd in August of 2014 to being in the top 30 ranked national teams in the world. Significantly, much of this improvement is due to wins in competitive matches (51.85% win rate) and not what should be the lower staked, easier games in the international friendlies (32.79% win rate).

Win PCT By Competition

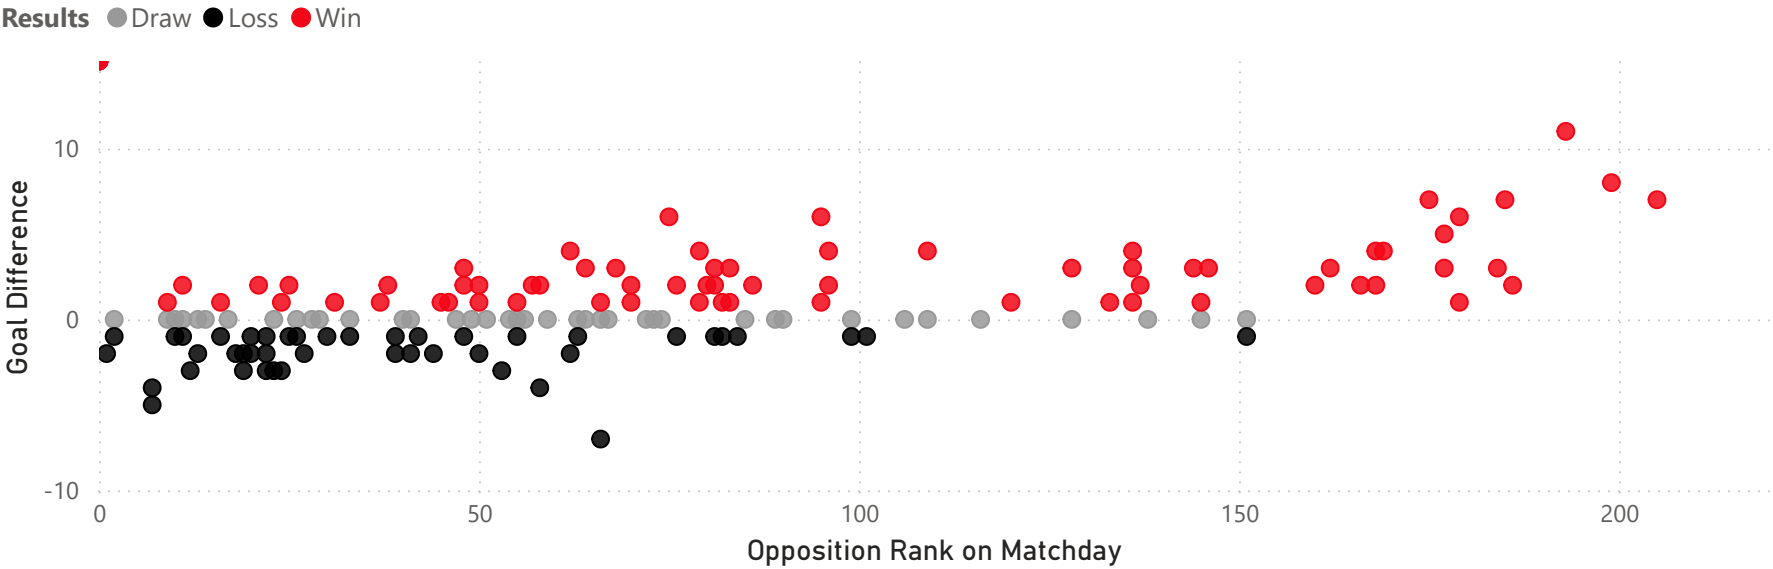

Average Goal Diff Against Mid-High Level Opposition

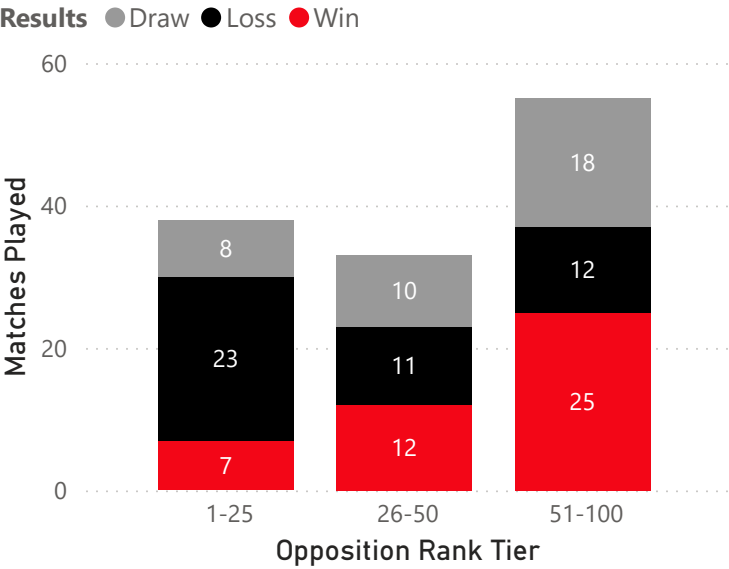

2016 is the last year the Canadian Men's National Football Team conceded more goals than they scored (a negative goal difference). From 2017 onward, there's been a positive trend in goal difference and consequently, match outcomes. On the competition level, it's clear Canada wins mostly in qualification campaigns. In tournament finals (not the Final, just the real competition) like the 2026 World Cup and the 2024 Copa America, there's still a gap Canada needs to fill before they can be taken as a genuine top level contender. From 2021 onward, Canada consistently beats mid level teams (ranked 26-50) but has yet to consistently win games against top level teams (ranked top 25).

Results Against Different Ranked Tiers

Matches Against Top 50 FIFA Ranked Nations

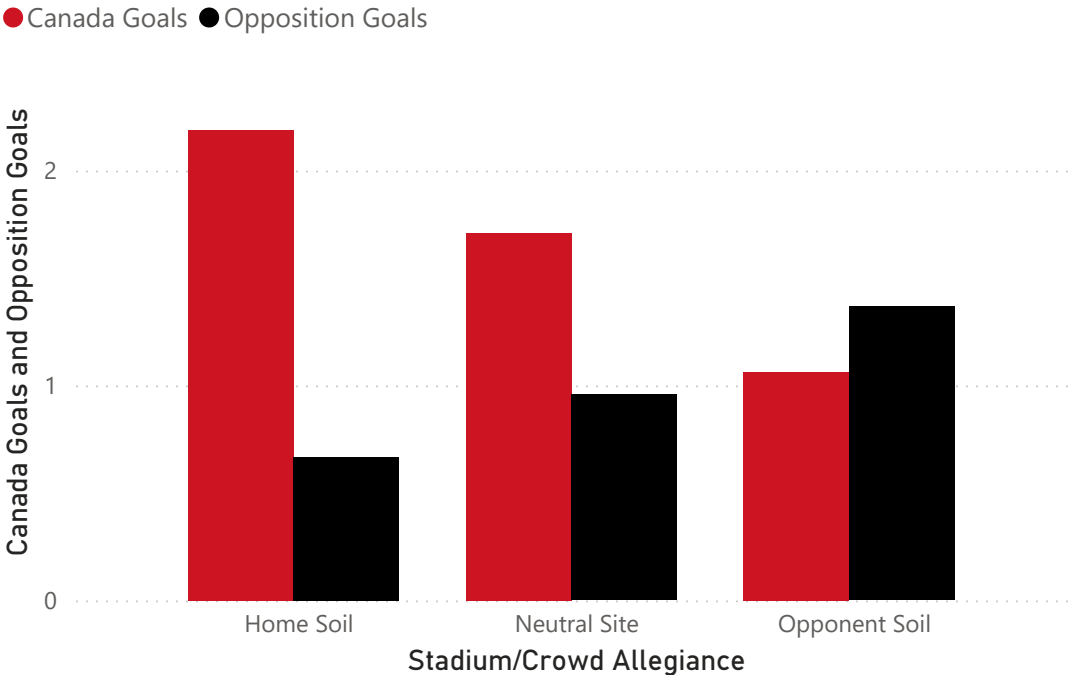

Year	Month	Day	Competition	Opposition	Results	Opp Matchday Rank
2010	May	24	Friendly	Argentina	Loss	7
2010	September	7	Friendly	Honduras	Win	46
2010	September	4	Friendly	Peru	Loss	39
2010	October	8	Friendly	Ukraine	Draw	26
2010	May	29	Friendly	Venezuela	Draw	49
2011	March	29	Friendly	Belarus	Win	37
2011	February	9	Friendly	Greece	Loss	10
2011	June	7	Gold Cup	United States	Loss	22
2012	February	29	Friendly	Armenia	Loss	41
2012	June	3	Friendly	United States	Draw	29
2012	September	11	WC Qualifier	Panama	Loss	50
2012	September	7	WC Qualifier	Panama	Win	50
2013	May	28	Friendly	Costa Rica	Loss	48

Average Opposition Rank by Competition

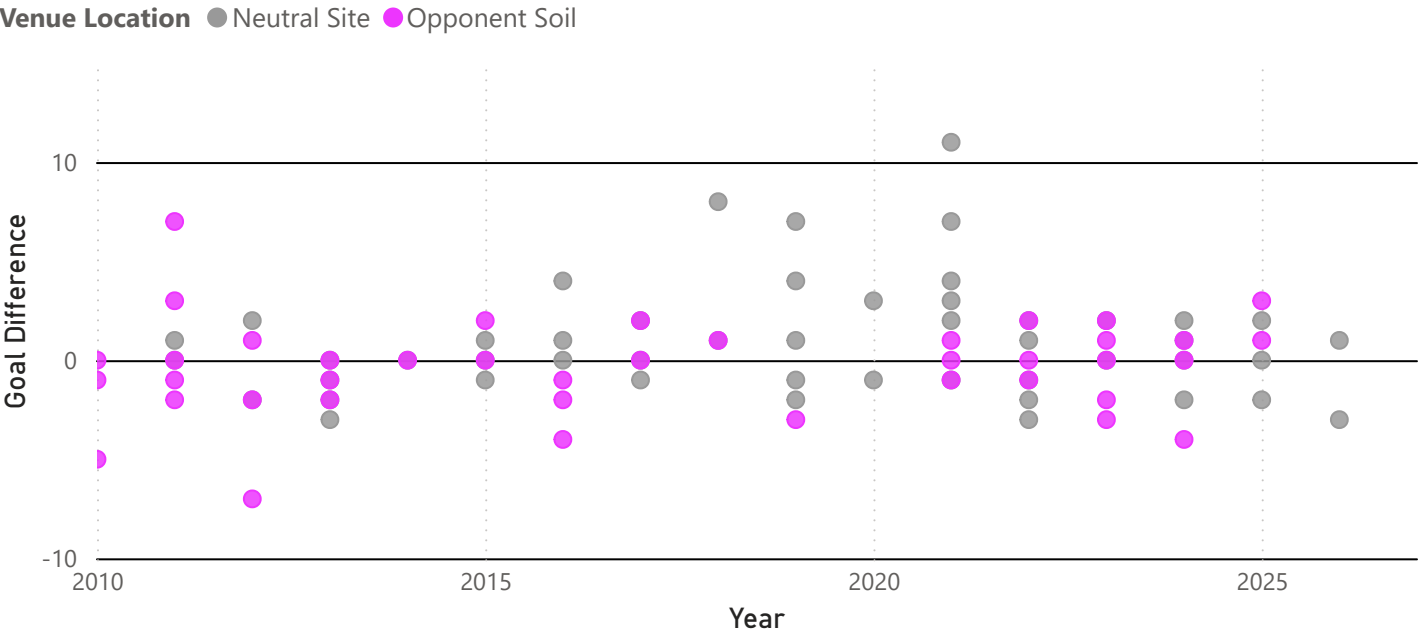

Defeating top 25 ranked nations remains as Canada's ceiling. Wins against this level of opposition are still rare compared to Canada's success against mid and lower-tier opponents. Canada most often plays against mid-high level opposition (ranked 1-50) in Friendlies, the World Cup Finals , the one off 2025 Canadian Shield & the Copa America

Canadian Performances Outside of Canada

Friendly vs Competitive Breakdown			
Match Type	Results	Avg Goal Diff	Avg Opp Matchday FIFA Rank
Friendly	Draw	0.00	56.65
Friendly	Loss	-1.95	43.43
Friendly	Win	1.75	72.80
Competitive	Draw	0.00	63.57
Competitive	Loss	-1.82	35.67
Competitive	Win	3.02	108.70

Competitive Outcomes VS Friendly Outcomes

The Canadian MNT clearly have the advantage for both scoring and results when performing at home and, to a lesser degree, Canada maintains an advantage on neutral turf. However, when the team plays in opposition grounds, the advantages are reversed -- though the opposition advantage is not as extreme as Canada's.

Over the 16 years examined in this report, Canada has played a lot more competitive matches, so it's not surprising to see the make-up of all 3 outcomes skews to competitive matches. What is surprising and somewhat counterintuitive is the fact that Canada tends to face higher quality opposition in international friendlies -- this is mostly due to the lower ranked CONCACAF teams competing in qualifiers.

Insights on the Canadian Men's National Team's Performances over the last 4 WC Cycles

FIFA ranking initially drops, bottoming out at 122nd in 2014 before sustained improvement which peaks at 26th in 2025 and has remained within the top 30 since.

Canada's strongest performances occur during major tournament qualifying campaigns, like World Cup qualifiers and CONCACAF Nations League qualifiers.

Home ground advantage significantly improved Canadian performances -- this is also true for opponents playing on their own home turf, but to a lesser degree.

Improvement against mid-level opposition is clear, and there is some improvement against top-level opposition with room to grow.

Evidence suggests Canada's success reflects genuine team improvement both when facing weaker opposition in qualifiers and mid-high level opposition in international friendlies and tournament finals.
